

Product Vision

This application is for asylum seekers who are interested in meeting people who are fluent in Swedish and learn Swedish. It also targets Swedish speakers interested in meeting and teaching Swedish to asylum seekers.

Our application will allow asylum seekers to easily meet Swedish speakers with the goal of easing their integration into society. At the same time it gives Swedish speakers a chance to communicate with and help asylum seekers integrate into Swedish society. This process is made possible by a 'match' feature that connects a mentor and a student and a way to communicate between the two.

Unlike many other applications focusing on connecting asylum seekers with Swedish speakers, our application places a larger emphasis on meeting face-to-face, for a more natural and organic experience, which will be of great help when integrating into society and learning a new language.
