

1:a Sprint

Sprint starts: Tuesday, 20/9, Lv4

Sprint ends: Tuesday, 27/9, Lv5

Sprint Planning

Remaining tasks from last sprint:

This is the first sprint so no remaining tasks from previous sprint.

User Stories to do this sprint(User stories divided into tasks in Trello):

1. Gustav & Jennifer: (User Story) As an asylum seeker I want to find a Swedish speaking mentor [5]
2. John & Raha: (User Story) As an asylum seeker, I want to be able to send messages to my mentor [8]
3. Elin & Johan: (User Story) As an user I want to have a profile so that I can save information about myself [13]

Our velocity for this sprint is 26.

Sprint Review

We have implemented the following stories:

G&J: We have made a view where matches appear when pressing the “match” button. When clicking on a match, a new view appear (right now the view for messaging).

J&R: We have created a view for messaging, the user is now able to write a message in a text field and send the message in a chat view. Right now the messages aren’t stored, just shown on the user’s phone.

E&J: We have made the “first-run” screens, which prompt the user for the information necessary to construct a basic profile. The app locally stores this data in a SharedPreferences file as key-value pairs. These can be loaded at any time.

Sprint Retrospective

1. **How did it go working with our tasks in the last sprint?**
 - a. **What went well?**
 - Familiarize ourselves with how Android development works
 - Meet our planned tasks
 - Finishing all the tasks in time
 - **The teamwork in pair-programmering teams**
 - b. **What went less well?**
 - To approximate points for the user stories
2. **Of what went less well, how will we improve it?**
 - a. Learn from our new found experience and make better estimations for our next sprint
3. **Something special someone learned that would be good to to share with the rest of the team?**
 - a. Nothing special this sprint
